## **AML Announces the M5520 Portable Data Terminal With an Integrated Long Range Laser Scanner**

**EULESS, TX – October 2002** – AML (American Microsystems, Ltd.), a global provider of reliable, high performance data collection products and services, announces the immediate availability of the M5520 Portable Data Terminal with integrated long range laser scanner.

The AML M5520 is a value-priced portable data collection terminal featuring the proven AML M5000 batch hand-held terminal (256K RAM, 2 MB Flash, 39-key, 4 line) and a new integrated long range scan engine offering a working range out to 20 ft./6.1 m for 100 mil reflective symbols. Designed to provide increased scan productivity in data collection applications where close proximity to bar codes is limited, the AML M5520 Portable Data Terminal delivers high performance in long range, scan-intensive applications in retail, warehousing, and manufacturing.

The M5520 Portable Data Terminal comes complete with everything users need to create programs quickly and efficiently without the added expense of program generator software. Each M5520 includes the Windows™ compatible M5000 Programmer – an integrated programming environment that provides a variety of functions including setting up the M5520 system parameters, creating lookup and data files, and communication functions for sending and receiving M5520 files to and from the PC.

The AML M5520 Portable Data Terminal is available for immediate shipment and includes a two-year warranty.
